

8 or 16 Way Remote

The standard hand held unit is designed to give full up /down control over 8 or 16 hoists at one time. The remote consists of 3 position switches with adjacent LEDs to give an indication of the direction the hoist will travel when the go button is pressed. The go button is fitted centrally below the selector switches and an extra LED gives a control voltage present indication. The 16 way is similar to the eight way remote shown above, but has two rows of switches and LEDs.

- Switch protection bar reduces the possibility of accidental damage
- High visibility yellow finish
- Can be fitted with an emergency stop button.
